

Environmental Policy

- As all business operations, Celtic Oriental Ltd inevitably contributes in some way to the global environment. As a conscientious organization we are committed to a system of operation which is constantly aware of its responsibilities towards society. We shall always consider improving any aspects of our operation that impact the environment.
- We strive to comply with all relevant environmental legislation as a minimum level of performance.
- This attitude is communicated to all staff by way of staff meetings that highlight and encourage responsible behavior by both the company and its staff regarding all activities.
- We monitor all significant aspects of our day to day production activities to assess the significance of our attempts to help sustain the environment.
- Thus far, we are proud of our contribution to the reduction of food miles for several materials that would traditionally be imported from The Far East. We have developed the production of alternative imports as replacement for some major Far Eastern products. Of this. we are very proud.
- Our factory has one of the lowest yield-to-waste-ratio as far as food production is concerned; this is a result of turning virtually all our raw organic materials into finished produce.
- We believe in recycling as much packaging as comes through our plant.
- We shall continue to operate on as minimal amounts of detergents as possible, concentrating on natural ways of maintaining hygiene while securing maximum safety for our customers and end users.
- We keep an open mind on considerations of practical and economic benefits from all parties towards maintaining the environment.
